

SIDEWALL PANEL LAMINATION

What interior panel refurbishment services do we offer?

- Complete refurbishment of sidewalls, ceiling panels, overhead bin doors and monuments.
- We remove existing laminate; we do not laminate over existing – this avoids substantial additional weight to the panels and enables repairs (if necessary) to the composite structure.
- From shipsets to single panels - prices available on application.
- Fast turnaround from our Letchworth workshop.
- Fully trained, certificated and professional cabin technicians carry out the lamination

Sidewall Panel Refurbishment

- Inspection in accordance with CMM
- Remove one sheet of lamiente
- Preperation for lamiantion (not including composite repair)
- Apply on sheet of new lamiente
- Release of certificate

Additional costing

Small Area Repair

Medium Area Repair

Large Area Repair

Laminate can be customer supplied or charged accordingly depending on the required specification.

Bostik-7132R Glue will be be charged at \$450.00 per tin, we esitmate that three tins are required for fifty sidewall panel.

Should spares be required for the sidewall panel, i.e. plastic trimming parts, these will charged depending on the PN required.

Standard TAT's

- Our standard TAT on a shipset of sidewall will be 21-28 working days from the point of approval and payment.
- We are able to offer an AOG service to reducing our lead time to 7-10 working days for a shipset of sidewall panel, the additonal charge of AOG service will be \$150.00 per sidewall panel.

About us
